

INTERACTIVE INFERENCE

Retreat 2024 in Duderstadt

September 23 — September 27, 2024 | Jugendgästehaus Duderstadt

PROGRAM

Dear colleagues,

We are delighted that you are joining us for the retreat and look forward to a relaxed week filled with productive work.

Upon arrival, we will start with a tutorial on "Tree Decompositions." We plan to work in groups on Tuesday and Thursday, with presentations scheduled for Thursday afternoon. Please scan the QR code below to view your group assignments and the relevant papers. On Wednesday, expect a tutorial on "Einsum: A Formal Language for Tensor Expressions."

After lunch on Wednesday, we will go on a 4-hour hike starting at the Stadtwall loop, continuing to the Natur-Erlebniszentrum Sielmann Stiftung, and then returning to the Jugendgästehaus for dinner. On Thursday evening, as a concluding event, we have booked a guided tour "In the Footsteps of the Night Watchman," which begins at 8:00 PM at the town hall.

We will return to Jena on Friday after breakfast. We have arranged full board for you, and beverages will be available during meal times and in the evenings in the Kaminzimmer for a cozy gathering.

Please refer to the following pages of this booklet for the detailed program.

Have fun and enjoy your time!
