

## **Session Program**

28 September 2026 to 1 October 2026

# **Integrative Social-Ecological Knowledge Systems: Conceptual and Computational Foundations for Ecological Synthesis**

## ***Working groups***

CIP, E010  
Inselplatz 5 07743 Jena

## Tuesday 29 September

|       |                                                                                               |
|-------|-----------------------------------------------------------------------------------------------|
| 14:10 |                                                                                               |
| 15:55 | <b>Working groups: Open working group A</b><br>Session   Location: CIP, B                     |
| 14:10 |                                                                                               |
| 15:55 | <b>Working groups: Open working group B</b><br>Session   Location: CIP, C                     |
| 14:10 |                                                                                               |
| 15:55 | <b>Working groups: Uncertainty and challenges working group</b><br>Session   Location: CIP, A |
|       | 14:10–14:55 Reference Tracking of “Uncertainty” in Ecological Research                        |
|       | 14:55–15:55 Challenges and risks when weaving ecological ideas                                |
| 16:15 |                                                                                               |
| 18:15 | <b>Working groups: Open working group C</b><br>Session   Location: CIP, B                     |
| 16:15 |                                                                                               |
| 18:15 | <b>Working groups: Open working group D</b><br>Session   Location: CIP, C                     |

## Wednesday 30 September

|       |                                                                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| 12:50 | <b>Working groups: EcoWeaver Workbench — hands-on schema prototyping</b><br>Session   Location: CIP, Gentian                                  |
| 13:35 |                                                                                                                                               |
| 12:50 | <b>Working groups: Interweaving Western and Indigenous water knowledges on rivers</b><br>Session   Location: CIP, Feather grass               |
| 13:35 | <b>12:50–13:35 Interweaving Western and Indigenous Water Knowledges on Rivers</b>                                                             |
| 12:50 | <b>Working groups: Open working group E</b><br>Session   Location: CIP, Cornflower                                                            |
| 13:35 |                                                                                                                                               |
| 13:45 | <b>Working groups: Bridging the evidence gap: a collaborative question-ranking workshop for EcoWeaver</b><br>Session   Location: CIP, Gentian |
| 15:15 | <b>13:45–15:15 Bridging the Evidence Gap: A Collaborative Question-Ranking Workshop for EcoWeaver</b>                                         |
| 13:45 | <b>Working groups: Indigenous and local knowledge-weaving: territorial perspectives</b><br>Session   Location: CIP, Cornflower                |
| 15:15 |                                                                                                                                               |
| 13:45 | <b>Working groups: Open working group G</b><br>Session   Location: CIP, Feather grass                                                         |
| 15:15 |                                                                                                                                               |
| 15:35 | <b>Working groups: Indigenous data sovereignty in computational ecological knowledge integration</b><br>Session   Location: CIP, Gentian      |
| 17:05 | <b>15:35–17:05 Indigenous data sovereignty in computational ecological knowledge integration</b>                                              |
| 15:35 | <b>Working groups: Open working group H</b><br>Session   Location: CIP, Cornflower                                                            |
| 17:05 |                                                                                                                                               |
| 15:35 | <b>Working groups: Open working group I</b><br>Session   Location: Feather grass                                                              |
| 17:05 |                                                                                                                                               |

## Thursday 1 October

13:05

### Working groups: Open working group J

Session | Location: CIP, Cornflower

13:50

13:05

### Working groups: Open working group K

Session | Location: CIP, Feather grass

13:50

13:05

### Working groups: Reference tracking of "uncertainty" — Part 2: graphs, projections and participant testing

Session | Location: CIP, Gentian

13:50
